Project Experiences

1. Kankoku Seikei Navi (Company Project)

Live: <https://kankoku-seikei-navi.com/>

Description:

Worked on a Japanese medical tourism website focused on providing information about Korean cosmetic surgery. The site includes detailed content pages, navigation structure, and responsive design for accessibility.

Responsibilities:

- Assisted in front-end development of content pages
- Implemented responsive layouts for mobile and desktop
- Improved UI structure for better readability and navigation

Tech Stack:

HTML / CSS / JavaScript / WordPress

2. Ajioku Online Shop (Company Project)

Live: <https://ajioku.jp/>

Description:

Contributed to the development of an e-commerce website for a traditional Japanese rice cracker brand, featuring product listings and online shopping functionality.

Responsibilities:

- Built front-end UI for product and category pages
- Implemented responsive layouts
- Enhanced user experience for smoother shopping flow

Tech Stack:

HTML / CSS / JavaScript / EC-CUBE

3. Setagaya Biyo (Company Project)

Live: <https://setagaya-biyo.jp/>

Description:

Developed and maintained the front-end of a Japanese beauty/clinic website, focusing on clean UI design, structured service presentation, and fully responsive user experiences across devices.

Responsibilities:

- Built front-end UI for service and information pages
- Implemented responsive layouts for mobile and desktop
- Ensured consistent styling and user-friendly navigation
- Assisted in improving overall site usability and performance

Tech Stack:

HTML / CSS / JavaScript / Wordpress
